-  Entrance/Exit

Villa Miralfiore

The History

Villa Miralfiore transitioned from a rural Malatesta house (1260) to a residence of the Della Rovere family (1559), adorned by the Zuccari brothers in the 16th century. In 1776, it was granted under emphyteusis to the Albani family (later Castelbarco-Albani) and has been owned by the Livi family since 1992.

Architecture of the Villa

The villa features a classic Renaissance style, with symmetry and proportions that reflect the ideals of harmony and order of the Italian Renaissance. Inside, it houses a series of frescoes created by the Zuccari brothers in the 16th century.

Italian Gardens

The gardens, designed in the 17th century in the Italian style, are characterized by precise geometries and topiary art, where evergreen hedges and bushes are pruned into intricate decorative shapes.
